

# Nexora Technologies Pvt. Ltd. — Human Resources Team

**Organization ID:** ORG-NEX-001

**Department:** Human Resources

**Current HR Team Size:** 2 members

## 1. HR Team Overview

The Human Resources department at Nexora Technologies is responsible for workforce planning, recruitment, employee operations, compensation coordination, and hiring support for the company's Engineering, AI, and Executive teams.

The company is currently expanding rapidly. Because of the company's growth, HR has received approval to hire 10 additional employees: 5 for Engineering, 3 for Artificial Intelligence, and 2 for Executive Management.

## 2. Approved Hiring Plan

| Department              | Number of Hires | Annual Hiring Budget |
|-------------------------|-----------------|----------------------|
| Engineering             | 5               | ■1,10,00,000         |
| Artificial Intelligence | 3               | ■1,65,00,000         |
| Executive Management    | 2               | ■1,80,00,000         |
| Total                   | 10              | ■4,55,00,000         |

Total approved hiring budget: ■4,55,00,000 per year.

## 3. Engineering Hiring Plan

**Number of hires required:** 5

**Total hiring budget:** ■1,10,00,000 per year

The engineering hiring plan focuses mainly on backend, infrastructure, database, and frontend capabilities required to support the continued development and scaling of NexoraFlow.

**Required Engineering Skills:** Python; Java; FastAPI; REST APIs; microservices; PostgreSQL; distributed systems; cloud infrastructure; Docker; Kubernetes; React; TypeScript; system design; database optimization; event-driven architecture.

## 4. AI Team Hiring Plan

**Number of hires required:** 3

**Total hiring budget:** ■1,65,00,000 per year

The AI team has a higher hiring budget because AI and machine-learning specialists are strategically important to the company's product roadmap and future NexoraLM project.

**Required AI Skills:** Machine Learning; Deep Learning; Python; PyTorch; TensorFlow; Large Language Models; Generative AI; Retrieval-Augmented Generation; Transformers; fine-tuning; model evaluation; embeddings; vector databases; distributed model training; GPU infrastructure; AI inference optimization; MLOps.

## 5. Executive Team Hiring Plan

**Number of hires required:** 2

**Total hiring budget:** ■1,80,00,000 per year

The executive hiring plan is focused on adding senior leadership capabilities required to support the company's rapid growth.

**Required Executive Skills:** corporate strategy; business development; financial planning; risk management; technology strategy; product strategy; organizational leadership; operations management; investor relations; strategic partnerships; corporate governance; AI business strategy.

## 6. HR Team Members

The HR department currently has two members responsible for managing the hiring process. Both HR employees have non-technical backgrounds. They manage recruitment coordination, candidate screening, compensation discussions, interview scheduling, and communication with department managers.

| Employee ID | Name           | Age | Education              | Role                          | Current Salary |
|-------------|----------------|-----|------------------------|-------------------------------|----------------|
| NEX-HR-001  | Priyanka Verma | 34  | MBA in Human Resources | HR Manager                    | ■22,00,000     |
| NEX-HR-002  | Rahul Sharma   | 31  | MBA in HR and B.Com    | Talent Acquisition Specialist | ■15,00,000     |

## 7. Priyanka Verma

**Employee ID:** NEX-HR-001

**Age:** 34

**Education:** MBA in Human Resources

**Role:** HR Manager

**Department:** Human Resources

**Current Salary:** ■22,00,000 per year

Priyanka Verma manages the company's recruitment and workforce planning activities. She works with Engineering, AI, and Executive leadership to understand hiring requirements and coordinate recruitment.

**Responsibilities:** workforce planning; recruitment strategy; hiring budget coordination; candidate screening; interview coordination; offer management; compensation discussions; recruitment reporting; employee onboarding; HR policy coordination.

Priyanka has a non-technical background. She relies on department managers and technical interviewers to evaluate candidates' technical capabilities.

## 8. Rahul Sharma

**Employee ID:** NEX-HR-002

**Age:** 31

**Education:** MBA in Human Resources and Bachelor of Commerce

**Role:** Talent Acquisition Specialist

**Department:** Human Resources

**Current Salary:** ■15,00,000 per year

Rahul Sharma specializes in recruitment and candidate coordination. He works directly with candidates throughout the hiring process and coordinates interviews with Engineering, AI, and Executive hiring managers.

**Responsibilities:** candidate sourcing; resume screening; candidate communication; interview scheduling; recruitment pipeline management; offer coordination; candidate documentation; recruitment analytics; hiring status reporting; onboarding coordination.

Rahul has a non-technical background and does not independently evaluate advanced engineering or AI skills. Technical assessment is performed by the relevant technical teams.

## 9. HR Hiring Process

**Step 1 — Hiring Requirement:** The department manager submits the required role, number of positions, required skills, and proposed salary range.

**Step 2 — HR Validation:** HR verifies that the proposed hiring requirement is within the approved hiring plan and budget.

**Step 3 — Candidate Sourcing:** HR sources candidates through recruitment platforms, employee referrals, professional networks, and recruitment agencies.

**Step 4 — Initial Screening:** HR evaluates candidates based on experience, education, salary expectations, availability, and general role requirements.

**Step 5 — Technical Evaluation:** Engineering and AI candidates are evaluated by members of the relevant technical department.

**Step 6 — Leadership Evaluation:** Executive candidates are evaluated by senior leadership and relevant executive stakeholders.

**Step 7 — Compensation Review:** HR evaluates candidate compensation against the approved hiring budget.

**Step 8 — Offer:** HR prepares and communicates the employment offer.

**Step 9 — Onboarding:** After acceptance, HR coordinates documentation and onboarding.

## 10. Current Hiring Requirements

**Engineering — 5 Positions:** Priority: High. The engineering department requires additional engineers to support NexoraFlow development and infrastructure scaling. Required capabilities include backend development, frontend development, database engineering, cloud infrastructure, distributed systems, API development, and system design. Budget: ■1.10 crore annually.

**AI — 3 Positions:** Priority: Very High. The AI department requires additional specialists because the company is expanding AI integration across its products and preparing for NexoraLM. Required capabilities include machine learning, deep learning, LLMs, generative AI, RAG, model training, model optimization, MLOps, and GPU infrastructure. Budget: ■1.65 crore annually.

**Executive — 2 Positions:** Priority: Medium. The company requires additional senior leadership capabilities to support continued growth and risk management. Required capabilities include corporate strategy, finance, operations, business development, risk management, product strategy, technology strategy, and organizational leadership. Budget: ■1.80 crore annually.

## 11. HR Department Summary
