

Nexora Technologies Pvt. Ltd. — Artificial Intelligence Team

Organization ID: ORG-NEX-001

Department: Artificial Intelligence

Team Size: 5 members

1. Company and AI Team Overview

Nexora Technologies is currently experiencing rapid business growth. The company is focusing on increasing profitability while minimizing potential business and technology risks. AI has become a major part of the company's strategy because the company is integrating AI capabilities across its products and internal business operations.

Over the past three months, the company's share price has increased by approximately 10%. Management attributes the improvement to stronger financial performance, growing customer adoption, improved operational efficiency, and investor confidence in the company's AI strategy.

The AI team is considered a strategically important team within the company. Although it has only five members, its average compensation is significantly higher than the average compensation of the broader engineering team because of the specialized skills required for machine learning, LLM integration, model optimization, and AI infrastructure.

2. AI Team Structure

The AI team consists of five members: AI Lead / ML Architect; Senior Machine Learning Engineer; LLM Engineer; AI Research Engineer; and Machine Learning Engineer.

All five members are relatively young and graduated from IITs.

Employee ID	Name	Age	Education	Role	Current Salary
NEX-AI-001	Karthik Menon	29	IIT Madras	AI Lead / ML Architect	■58,00,000
NEX-AI-002	Sneha Kapoor	27	IIT Bombay	Senior Machine Learning Engineer	■52,00,000
NEX-AI-003	Riya Iyer	25	IIT Delhi	LLM Engineer	■48,00,000
NEX-AI-004	Aditya Rao	26	IIT Kharagpur	AI Research Engineer	■50,00,000
NEX-AI-005	Meera Nair	24	IIT Kanpur	Machine Learning Engineer	■44,00,000

3. Karthik Menon

Employee ID: NEX-AI-001

Age: 29

Education: IIT Madras

Degree: B.Tech in Computer Science and Engineering

Role: AI Lead / ML Architect

Team: Artificial Intelligence

Current Salary: ■58,00,000

Karthik leads the company's AI engineering strategy. He is responsible for designing the architecture used to integrate AI capabilities across Nexora Technologies' products.

Responsibilities: AI architecture; LLM integration; model selection; AI infrastructure planning; AI security; model evaluation; AI platform architecture; technical leadership for the future NexoraLM project.

4. Sneha Kapoor

Employee ID: NEX-AI-002

Age: 27

Education: IIT Bombay

Degree: B.Tech in Electrical Engineering

Role: Senior Machine Learning Engineer

Team: Artificial Intelligence

Current Salary: ■52,00,000

Sneha works on machine learning systems and production AI integration.

Responsibilities: Machine learning pipelines; model evaluation; fine-tuning; feature engineering; model performance optimization; AI experimentation; production ML systems; AI-powered workflow features.

5. Riya Iyer

Employee ID: NEX-AI-003

Age: 25

Education: IIT Delhi

Degree: B.Tech in Mathematics and Computing

Role: LLM Engineer

Team: Artificial Intelligence

Current Salary: ■48,00,000

Riya specializes in Large Language Models and generative AI systems.

Responsibilities: LLM integration; prompt engineering; retrieval-augmented generation; embedding systems; model evaluation; context management; LLM inference optimization; AI agent development. Riya also participates in early technical research for NexoraLM.

6. Aditya Rao

Employee ID: NEX-AI-004

Age: 26

Education: IIT Kharagpur

Degree: B.Tech in Computer Science and Engineering

Role: AI Research Engineer

Team: Artificial Intelligence

Current Salary: ■50,00,000

Aditya focuses on AI research and experimentation.

Responsibilities: AI research; model architecture experiments; training experiments; fine-tuning techniques; model benchmarking; dataset analysis; evaluation frameworks; research prototypes. Aditya is expected to play an important role in the future development and training of NexoraLM.

7. Meera Nair

Employee ID: NEX-AI-005

Age: 24

Education: IIT Kanpur

Degree: B.Tech in Computer Science and Engineering

Role: Machine Learning Engineer

Team: Artificial Intelligence

Current Salary: ■44,00,000

Meera is the youngest member of the AI team and works primarily on production machine learning systems.

Responsibilities: ML pipelines; data preprocessing; model deployment; model monitoring; AI APIs; inference optimization; AI testing; integration of ML models with NexoraFlow.

8. AI Team Compensation Summary

Total AI Team Salary: ■2,52,00,000 per year

Average AI Team Salary: ■50,40,000 per year

The AI team has five members and a significantly higher average salary than the broader 20-member engineering team. The higher compensation reflects specialized expertise in machine learning, Large Language Models, AI research, model optimization, and AI infrastructure.
